ENVIRO SAVE HELPS FIRSTBUS ACHIEVE 10% FUEL SAVINGS

POINT ROBERTS, WA - FirstBUS Canada Ltd. entered into a contract in February 2005 to purchase Enviro Save® powertrain treatment kits for their fleet of 91 buses and 39 automobiles in Ottawa, Ontario, and 24 buses in Regina, Saskatchewan. As stated by the contract manager, "We were looking for a product that could if possible extend the life of the engines..."

As a result of this installation, FirstBUS has reported a significant improvement in fuel mileage. Business Development Manager, Peter Knightley stated, "...we are seeing an improvement of close to 10% on fuel economy and no engine or transmission failures. We have just been advised by our maintenance manager that one engine and two transmissions have just failed...on vehicles we had not treated with Enviro Save kits!"

FirstBus responded from seeing a recent 105-page report from Long Beach Transit in California. Mr. Knightley, saw an opportunity for his operation to reduce overall cost in fleet maintenance. The 105-page report reflected statistical significance in the reduction of metal wear across the fleet in both engines and transmissions.

Enviro Save® products are also installed in other transportation systems like Los Angeles MTA, Long Beach Transit, Central Contra Costa County Transit Authority, Montebello Bus Lines, Canadian Coast Guard, Clallam Transit, TransLink Skytrain, SEPTA, UTA Transit, Annapolis Transit, and Corpus Christi Transit. In addition, we have serviced the trucking industry for many years. With over 550,000 applications worldwide, helping clients save money is our goal, says David Stumpo, vice-president of operations.

About Enviro-Save Products (ESP):

ESP is headquartered in Point Roberts, Washington with dealers located globally. Enviro Save® has been manufactured for over 15 years. Enviro Save is a TFE resin based product which reduces the coefficient of friction and increases the life cycle of equipment. It is not an oil or fuel additive. Laboratory test from SAE and EPA certified labs have concluded a significant improvement in the use of this product. Enviro Save is a service proven product that will change the way fleet owners maintain their equipment and the best part --- saving money on fuel cost. For more information about the Enviro Save Products, visit the website at www.envirosave.us or call toll free at (866)945-3800.
